**REQUEST FOR FEEDBACK & DISCLAIMER**
CALL FOR MANUSCRIPTS

We invite unpublished novel, original, and high-quality research work pertaining to recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography; Development Planning; Development Studies; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the soft copy of unpublished novel; original; empirical and high-quality research work/manuscript anytime in M.S. Word format after preparing the same as per our GUIDELINES FOR SUBMISSION; at our email address i.e. infoijrcm@gmail.com or online by clicking the link online submission as given on our website (FOR ONLINE SUBMISSION, CLICK HERE).

GUIDELINES FOR SUBMISSION OF MANUSCRIPT

1. COVERING LETTER FOR SUBMISSION:

THE EDITOR

IJRCM

DATED: _____________

Subject: SUBMISSION OF MANUSCRIPT IN THE AREA OF.

(e.g. Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)

DEAR SIR/MADAM

Please find my submission of manuscript entitled ‘_____________’ for possible publication in your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published elsewhere in any language fully or partly, nor is it under review for publication elsewhere.

I affirm that all the author(s) have seen and agreed to the submitted version of the manuscript and their inclusion of name(s) as co-author(s).

Also, if my/our manuscript is accepted, I/we agree to comply with the formalities as given on the website of the journal & you are free to publish our contribution in any of your journals.

NAME OF CORRESPONDING AUTHOR:

Designation:

Affiliation with full address, contact numbers & Pin Code:

Residential address with Pin Code:

Mobile Number(s):

Landline Number(s):

E-mail Address:

Alternate E-mail Address:

NOTES:

a) The whole manuscript is required to be in ONE MS WORD FILE only (pdf. version is liable to be rejected without any consideration), which will start from the covering letter, inside the manuscript.

b) The sender is required to mention the following in the SUBJECT COLUMN of the mail:

New Manuscript for Review in the area of (Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)

c) There is no need to forgive any text in the body of mail, except the cases where the author wishes to give any specific message w.r.t. to the manuscript.

d) The total size of the file containing the manuscript is required to be below 500 KB.

e) Abstract alone will not be considered for review, and the author is required to submit the complete manuscript in the first instance.

f) The journal gives acknowledgement w.r.t. the receipt of every email and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending separate mail to the journal.

2. MANUSCRIPT TITLE:

The title of the paper should be in a 12 point Calibri Font. It should be bold typed, centered and fully capitalised.

3. AUTHOR NAME (S) & AFFILIATIONS:

The author (s) full name, designation, affiliation (s), address, mobile/landline numbers, and email/alternate email address should be in italic & 11-point Calibri Font. It must be centered underneath the title.

4. ABSTRACT:

Abstract should be in fully italicized text, not exceeding 250 words. The abstract must be informative and explain the background, aims, methods, results & conclusion in a single para. Abbreviations must be mentioned in full.
5. **KEYWORDS**: Abstract must be followed by a list of keywords, subject to the maximum of five. These should be arranged in alphabetical order separated by commas and full stops at the end.

6. **MANUSCRIPT**: Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER**. It must be prepared on a single space and single column with 1” margin set for top, bottom, left and right. It should be typed in 8 point Calibri Font with page numbers at the bottom and centre of every page. It should be free from grammatical, spelling and punctuation errors and must be thoroughly edited.

7. **HEADINGS**: All the headings should be in a 10 point Calibri Font. These must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.

8. **SUB-HEADINGS**: All the sub-headings should be in a 8 point Calibri Font. These must be bold-faced, aligned left and fully capitalised.

9. **MAIN TEXT**: The main text should follow the following sequence:

   - **INTRODUCTION**
   - **REVIEW OF LITERATURE**
   - **NEED/IMPORTANCE OF THE STUDY**
   - **STATEMENT OF THE PROBLEM**
   - **OBJECTIVES**
   - **HYPOTHESES**
   - **RESEARCH METHODOLOGY**
   - **RESULTS & DISCUSSION**
   - **FINDINGS**
   - **RECOMMENDATIONS/SUGGESTIONS**
   - **CONCLUSIONS**
   - **SCOPE FOR FURTHER RESEARCH**
   - **ACKNOWLEDGMENTS**
   - **REFERENCES**
   - **APPENDIX/ANNEXURE**

   It should be in a 8 point Calibri Font, single spaced and justified. The manuscript should preferably not exceed **5000 WORDS**.

10. **FIGURES & TABLES**: These should be simple, crystal clear, centered, separately numbered & self explained, and titles must be above the table/figure. Sources of data should be mentioned below the table/figure. It should be ensured that the tables/figures are referred to from the main text.

11. **EQUATIONS**: These should be consecutively numbered in parentheses, horizontally centered with equation number placed at the right.

12. **REFERENCES**: The list of all references should be alphabetically arranged. The author(s) should mention only the actually utilised references in the preparation of manuscript and they are supposed to follow **Harvard Style of Referencing**. The author(s) are supposed to follow the references as per the following:

   - All works cited in the text (including sources for tables and figures) should be listed alphabetically.
   - Use (ed.) for one editor, and (ed.s) for multiple editors.
   - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
   - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
   - The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
   - For titles in a language other than English, provide an English translation in parentheses.
   - The location of endnotes within the text should be indicated by superscript numbers.

   PLEASE USE THE FOLLOWING FOR STYLE AND PUNCTUATION IN REFERENCES:

   **BOOKS**
   - Hunker, H.L. and A.J. Wright (1963), "Factors of Industrial Location in Ohio" Ohio State University, Nigeria.

   **CONTRIBUTIONS TO BOOKS**

   **JOURNAL AND OTHER ARTICLES**

   **CONFERENCE PAPERS**

   **UNPUBLISHED DISSERTATIONS AND THESES**

   **ONLINE RESOURCES**
   - Always indicate the date that the source was accessed, as online resources are frequently updated or removed.

ABSTRACT

Entrepreneurship has been considered for long as a process primarily aimed at creating one’s own business ventures and contributing to economic development and employment generation. It is not just about management, ideas, or shortage of funds, the focus need to be on the product. In the 21st century, the opportunities for growth, profits, success and the pace of development is increasing globally and the ability to adapt to change and willingness to adopt best practices, will acquire new value. Present paper highlights on hurdles in growth of entrepreneurship and reasons for failure of entrepreneurship. Researcher undergone reviews of literature and indentify the reasons of entrepreneurship failure and hurdles to become an entrepreneur. After the study researcher conclude that entrepreneurship education and support by family members will help to minimize the hurdles in growth of entrepreneurship.

KEYWORDS
Entrepreneur, Entrepreneurship, Business, Management Education, Entrepreneurship Development.

INTRODUCTION

Entrepreneurship is considered to be a prime mover in development. The nations, regions and communities that actively promote entrepreneurship development, demonstrate much higher growth rates and consequently higher levels of development than nations, regions and communities whose institutions, politics and culture hinder entrepreneurship. Entrepreneurship education seeks to provide students with the knowledge, skills, and motivation to encourage entrepreneurial success in a variety of settings. Variations of entrepreneurship education are offered at all levels of schooling from primary or secondary schools through graduate university programs. Entrepreneurship education distinctive is its focus on realization of opportunity, where management education is focused on the best way to operate existing hierarchies. Both approaches share an interest in achieving "profit" in some form (which in non-profit organizations or government can take the form of increased services or decreased cost or increased responsiveness to the customer/citizen/client).

REVIEW OF LITERATURE

HURDLES IN GROWTH AND REASONS FOR FAILURE OF ENTREPRENEURSHIP

‘It was found out that due to absence at right orientation it become difficult for the entrepreneurs to sustain the business. Problem lies in Indian education system and more so in social system’. (Shekhar).

‘Despite the attention given to upgrading managerial skills, there are many variables, which are beyond the control of the small business manager. Among these are increased competition, inflation, large business power, declining productivity, union power, cost of capital, tax rates, and legislation. Rather than having more control over these variables than others possess, the rural entrepreneur may, in fact, encounter greater difficulty in coping with the business environment than other small business managers. The study concluded that market related problems and lack of administrative expertise appear to be the most significant types over which the industrial owner/manager has some control. Financial problems were also considered important, but only “somewhat” influenced by added knowledge of the area. Small business managers seem to feel they have the power to deal with these three problem areas and are thus open to advice, which will improve their marketing, management, and financial abilities. Other problems viewed as largely uncontrollable are those relating to government regulations and economic conditions. The external nature of these problems seems to frustrate management attempts to overcome them. Entrepreneurs cite these issues as major problems inhibiting the successful operation of their businesses, yet do not seek outside help in these areas (C., Theme Article)’. ‘Paper describes the theoretical and historical support, where three pedagogical models are compared, including two alternative experiential methods: simulations and the contingency approach. The contingency model, as introduced, utilizes Piaget’s concept of equilibration, and is asserted to provide both cognitive tools and flexibility in accommodating unanticipated environmental factors faced by future entrepreneurs’.

CURRENT SCENARIO OF ENTREPRENEURSHIP

‘Several management schools in India now have at least one course in entrepreneurship, many have a more complete curriculum, and a few integrate entrepreneurship throughout their educational approach. In the last few years, some management schools in India have taken certain steps by making entrepreneurship a part of their activity. The Indian School of Business, Hyderabad, has instituted a Wadhwani Centre for Entrepreneurial Development.; the Indian Institute of Management Bangalore has a Nadadur S Raghavan Center for Entrepreneurial Learning. The more traditional management curricula in India predominantly focus on functional and strategic management of commercial, corporate, and organized sectors. However, the need for a more efficient and professional entrepreneurship culture is that likely to socially impact sectors such as energy, power, transport, irrigation, telecom, education, health, and development especially poverty reduction, is being increasingly recognized in many informed circles. The reason has to be that if more individuals start business ventures in these sectors, not only can the quality of life of people in general improve, but the efficiency, productivity, and profitability of these sectors also stand to gain. Entrepreneurs increase competitive pressure, forcing other firms to react by improving efficiency or introducing innovation. Increased efficiency and innovation within firms, whether in organization, processes, products, services, or markets, enhance the competitive strength of an economy as a whole. Offers consumers benefits through greater choice and lower prices the concern to foster an entrepreneurial drive becomes more important as the rate of growth of employment /jobs in Indian large organizations / corporate sector is much lower compared to the number of graduates coming out of management schools’. (Venkatachalam Balaji V., 2005).

(Anjan, 2005)’Study orates that while entrepreneurial inclination is strong in India, support from the educational system in fostering entrepreneurship seems to be lagging behind. It needs to be addressed to make Indian business schools excel in entrepreneurship education. If urgent and immediate action is taken by the Indian academic community, the window to a huge educational opportunity can be unfolded, ultimately resulting in substantial benefits to the economy and society.

‘Entrepreneurship A self-employment career’, entrepreneurs play an important role in triggering socio economic change and development. Entrepreneurial competencies can be developed by the understanding what a particular by the means and with such a competence one would be able to recognize the competence when someone else exhibits the same. Parents have now become more aware about the need and importance of self employment and an entrepreneurial career.’ (Burke Ronald, 2010).
ENTREPRENEURSHIP DEVELOPMENT

‘Choice and attitude towards business as an occupation were predicted from the components of instrumentality theory (Mitchell, 1973). The results supported the theory. There also was a strong indication that the reasons for not choosing business were more related to the instrumental component of the theory than to the evaluation component. Analysis of entrepreneurial programs helped to develop a range of technical, behavioural, managerial, and enterprise-building skills, leading to small business development and resource generation among youths.’ (Muyia, 1998)

A Model of entrepreneurship is designed to accomplish two primary aims: (1) the separation of factors into discrete divisions, and (2) the portrayal of the complexity of the decision process that results in the initiation of an entrepreneurial venture(f., Theme Article). It provides a new construct of precise entrepreneurial descriptors and a more exacting, richer model for the chronology of enterprise initiation.

‘Political, social, and business leaders and a team spirit in the community are all critical to encouraging entrepreneurship. Such Support influences perceptions that starting a business is desirable and that doing so is feasible Author believes that Entrepreneurs are made, not born. They are made through a perception-driven enactive process that begins with forging a potential for entrepreneurship. As educators, as consultants, and as policy advisers we can assist this process through helping empower potential entrepreneurs who will be better able to seize opportunities when the environment presents them’. (Kureger Norris F., 1994)

‘Strong internal control is emphasized by those entrepreneurs who have less work experience. Entrepreneurs with versatile work experience in production, marketing and product development scored lower on the indicator of internal attributing. The indicator of internal attributing also separates typical owner entrepreneurs from professional managers. Entrepreneurs are people who believe that by their own action they are able to influence their environment or the event that befall them. The findings support the acceptance of the hypothesis that internal control expectation is usually associated with entrepreneurial characteristics. Study demonstrates that the indicator of strategic locus of control is no more sensitive to changes in the environment when adapted to the entrepreneurial context than the indicator of internal locus of control.’ (Esa, 2000)

‘Internal LOC correlates with the expansion plans of those who either started and manage or only manage a small business. The results suggest that an internal LOC person is willing to plan for expansion of their small business despite high unemployment and interest rates in the immediate economic environment.’ (Edward, 1993)

Entrepreneurs’ working style and its influence the entrepreneurship but need arises to know about the details (Nur, 1993) ‘Kirton Adaption Innovation Inventory appears to be a reliable and valid tool for distinguishing innovative entrepreneurs from adaptive entrepreneurs. It provides a technique for classifying the problem-solving orientation of business initiators and can be useful to consultants in advising entrepreneurs.’ In case of sustainable entrepreneurship, ‘People with insight and zeal have accomplished great things and look forward for long-term benefits and concern about the environment. The operation model indicates that the organization can achieve the needs of the individual and the requirement of the community. The entrepreneur combines various aspects to develop sustainable business with the strong urge to keep ahead in the competitive world.’ (Viju, 2009).

CONCLUSION

After analyzing the previous work done by researcher it can conclude that to maintain business growth, Indian entrepreneurs need to segregate operating control of the business from beneficial ownership, mitigating business and family succession risks. However, in a male-centric culture, people are reluctant to relinquish operating control and institutionalize processes. Consequently, there are few large, structured, and professionally managed institutions in India. Indian businesses need to move from an entrepreneurial-driven, unstructured culture to one dominated by professional managers. Management control should rest with professionals, as they are able to perform more efficiently; beneficial ownership can continue to rest with the owners, who can still provide the vision and connections, and enjoy the fruits of efficient management.

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Commerce, IT & Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mail infoijrcm@gmail.com for further improvements in the interest of research.

If you have any queries please feel free to contact us on our E-mail infoijrcm@gmail.com.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active cooperation of like-minded scholars, we shall be able to serve the society with our humble efforts.
